

Emily Diaz

WORK EXPERIENCE

Senior UX Designer, Booz Allen Hamilton

June 2022-Present

- Designed & presented wireframes and prototypes for a proprietary, case management, web-based software used by the Department of Veterans Affairs (**VA**) based off of business requirements and multiple, live feedback sessions with stakeholders.
- Worked on over a dozen initiatives from design to production release that reduced processing time on Veteran appeals.
- Collaborated in sprint-planning & team-based sessions with over 12 development teams to evaluate and pre-refine stories on Jira. Helped write QA test scripts and user stories in Jira when teammates needed assistance.
- Maintained UX team's design system and documented discrepancies between it and our developers' codebase.
- Ensured that our components were 508 compliant for different ranges of sight and mobility in users and coordinated with developers to find 508 compliant improvements to existing components.
- Improved efficiency to our project work by implementing several design team enhancements, such as developing Figma plugins that would expedite the wireframing process or working with AI models and MCP servers to further bridge the design to developer gap.
- Created and presented an interactive onboarding guide and an online glossary of common terms in the **VA** to reduce onboarding friction.
- Involved in a **VA**, multi-project community of practice (**CoP**) for UX professionals and presented in this **CoP** on various UI/UX topics.

Product Analyst, ChartRequest

February 2022-June 2022

- Designed workflows and documented user stories on Jira that enhanced the overall user experience of existing clients.
- Identified design priorities with stakeholders that improved onboarding for self-service clients.

UX Lead, Reach for Help

October 2021-December 2023

- Designed paper wireframes, lo-fi and hi-fi prototypes on Figma that tackled and solved the issue of the map filter menu for the mobile design of the project.
- Assisted President of company with creating a pitch desk to present to investors and VCs at Google's Geo for Good Summit.

PROJECTS

X&D Advisor Hub, Booz Allen Hamilton

September 2025-Present

- Led and conducted the research, design, development, and release phases of a PowerApp to help increase acquisition and retention of advisors and advisees into the advisership program.
- Ran onboarding sessions at a quarterly cadence for new cohorts of advisors and advisees.

I'm a product designer with 5+ years of experience focused on meeting user needs by bridging the gap between design and the final product.

I solve complex, systemic gaps in B2B & B2G products by keeping communication and teamwork between design and developers foremost in my delivery.
