

Emily Diaz

Product Designer

Work Experience

Senior UX Designer, Booz Allen Hamilton

June 2022-Present

- Senior UX Designer for a proprietary, case management, web-based software used by the Department of Veterans Affairs (**VA**).
- Organized findings and recommendations found during user interviews. Designed wireframes and prototypes based off findings and business requirements and presented wireframes throughout multiple, live feedback sessions with stakeholders.
- Maintained UX team's design system and documented discrepancies between it and our developers' codebase. Ensured that our components met 508 accessibility standards with different screenreaders.
- Collaborated in sprint-planning & team-based sessions with over 12 development teams to evaluate and pre-refine stories on Jira. Helped write QA test scripts and user stories in Jira when teammates needed assistance.
- Improved efficiency to our project work by implementing several design team enhancements, such as developing Figma plugins that would expedite the wireframing process.
- Created and presented an interactive onboarding guide and an online glossary of common terms in **VA** project for new hires on the project.
- Involved in a **VA**, multi-project community of practice (**CoP**) for UX professionals and presented in this **CoP** on various UI/UX topics.

Product Analyst, ChartRequest

February 2022-June 2022

- Designed and iterated on full-scale projects and components that enhanced the overall user experience of existing clients.
- Identified design priorities with stakeholders that will help onboard new users onto the software as self-service clients. Developed user stories in Jira.

Extracurriculars & Volunteer Experience

X&D Advisor Hub, Booz Allen Hamilton

September 2025-Present

- Led and conducted the research, design, development, and release phases of a Powerapp to help increase acquisition and retention of advisors and advisees into the advisorship program.
- Ran onboarding sessions at a quarterly cadence for new cohorts of advisors and advisees.

UX Lead, Reach for Help

October 2021-December 2023

- Designed paper wireframes, lo-fi and hi-fi prototypes on Figma that tackled and solved the issue of the map filter menu for the mobile design of the project.
- Assisted President of company with creating a pitch desk to present to investors and VCs at Google's Geo for Good Summit.

I'm a product designer who thrives on learning, whether it is assessing and coming up with solutions for business gaps or stepping out of comfort zones to assist the immediate team. I combine inquisitive thinking with a user-first design approach. I'm always careful to mind the gap between design and development and work diligently to narrow the gap through engaged conversations and detailed handoff systems.
